

SoilLife-H's benefits include increased nutrient uptake, water retention, microbial growth, and overall improved soil structure.

As your soil improves, so will the health of your hemp plants.

SoilLife-H application rates & mixing directions

For superior results apply SoilLife-H as follows:

At planting

Mid-season,
flowering cycle
(6.5 - 8 weeks)

2 weeks
before harvest

1/8 acre (5,445 sq. ft.)	1/4 acre (10,890 sq. ft.)	1/2 acre (21,780 sq. ft.)	1 acre (43,560 sq. ft.)
1/4 quart (8 oz.) + 2.5 gal. water	1/2 quart (16 oz.) + 5 gal. water	1 quart (32 oz.) + 10 gal. water	2 quarts (64 oz.) + 20 gal. water

Mix SoilLife-H with water according to the application rate chart. SoilLife-H is versatile and compatible with most liquid fertilizers. It mixes easily in water and stays in suspension. SoilLife-H can be mixed and applied in-furrow with your starter fertilizer too. We recommend that you conduct a jar-test on new tank-mixers to check for sprayer flow.

Storage

SoilLife-H is very stable in concentrated form and will stay in suspension for up to 3 months, after which shake container for 15 to 30 seconds. Shelf life is a maximum of 12 months. For maximum shelf life, store in cool dry area.

AVOID excessive heat (95°F or less) and do not allow to freeze.

Ingredients

SoilLife-H is a proprietary blend of natural humate containing humic and folic acids, plant extracts, and natural sugars.
