

SoilLife-T™

Earth's Perfect Blend

SoilLife-T will lower maintenance costs by using less water, fertilizers and time.

32 oz. Sample

SoilLife-T's unique blend of humate, desert plant extracts and natural sugars help promote healthier soils, water retention and plant vigor.

Mixing Directions:

SoilLife-T is versatile and compatible with most liquid fertilizers. It mixes easily in water and stays in solution. SoilLife-T can be mixed and applied with your starter fertilizer at a lower rate per acre. It's suggested that you conduct a jar-test on new tank-mixes to check for sprayer flowability.

Standard Application Rates

8 oz. of SoilLife-T per gallon of water (hand sprayer or ATV sprayer tank application). SoilLife-T can be incorporated into existing irrigation systems.

Storage

SoilLife-T is very stable in concentrated form and will stay in suspension for up to 3 months. For maximum shelf-life, avoid excessive heat and store in cool, dry area (90° F or less). Do not allow to freeze.

Health and Safety

Avoid contact with eyes and mucus membranes. May be harmful if swallowed. If ingested, drink water and seek medical attention.
KEEP OUT OF REACH OF CHILDREN

Ingredients

SoilLife-T is a proprietary blend of natural humate containing humic and folic acids, desert plant extracts, and natural sugars.

Benefits

25 - 30% less water used on golf courses, lawns, landscaping and gardens

Less fertilizer needed due to the plant's ability to absorb water and nutrients more efficiently

Lower cost to maintain lawns, landscaping, golf fairways and greens

Increases seed germination rates while producing stronger, faster growing plants
